

LEVERAGING AFRICAN POSTAL NETWORKS IN INNOVATING RURAL ACCESS TO REMITTANCES AND FINANCIAL SERVICES

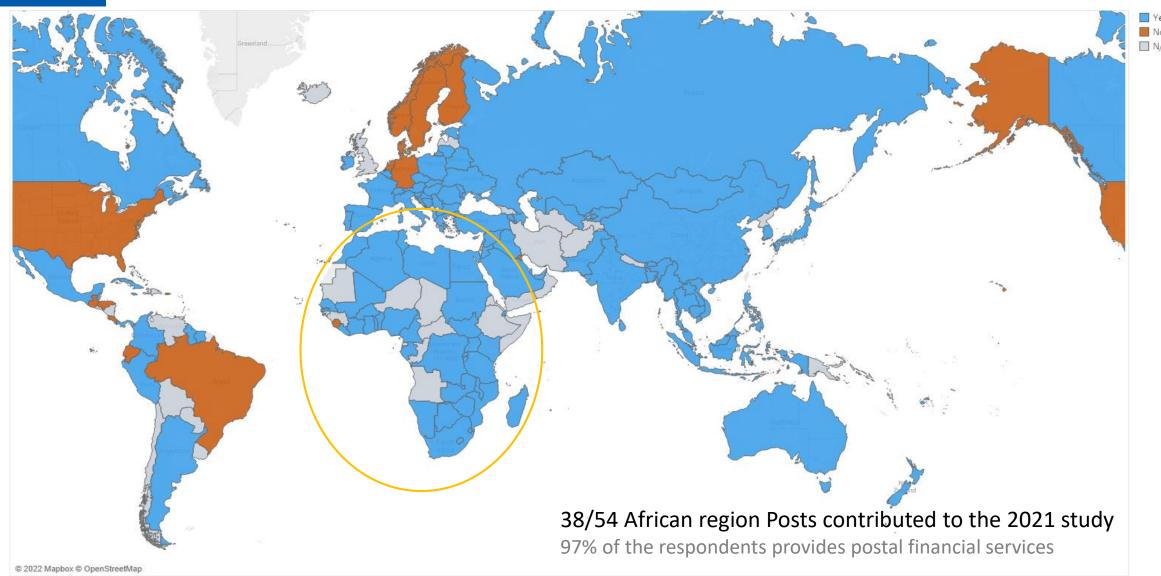

Sergey Dukelskiy

Coordinator, Sustainability and Financial Services IB UPU

2 December 2022

We are (almost) everywhere ...

Most DOs provide financial services

4 out of 5 DOs provide PFS

84% of DOs from 134 countries provide some type of financial services

All DOs in E. Europe & N. Asia provide PFS

97% of African Posts provides PFS

Only 65% Posts in the Americas do so

Globally 78% post offices in rural areas

Only 56% of African Post Offices are in rural areas

86% of all post offices in S. Asia & Oceania are in rural areas

Only 50% in the Americas

Financial services offered by Posts represent approximately 18% of total postal revenue, remaining stable over the past five years.

Types of postal financial services (PFS)

Account-based services

- ▶ Includes postal savings bank and postal bank accounts
- ▶ Posts have approx. 2,4 billion accounts for a total of approx. 1 billion customers

Payment services

- ► Transfers of money from one party to another (P2P, P2B, P2G, G2P, etc.)
- Primary FS offered by Posts with approx. 1.5 billion customers worldwide²

Gov. payments

Bills

Money orders

International

Domestic

Sent

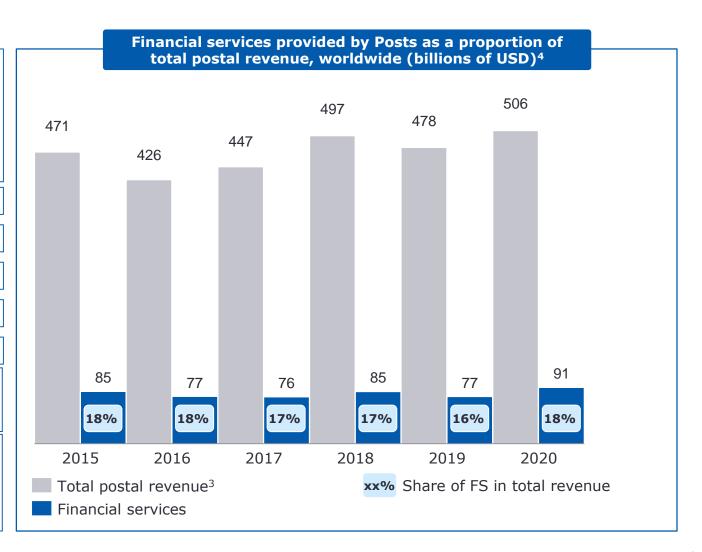

Received

Insurance services

► More Posts in developed countries provide insurance than in developing countries

Credit services

 Only a few Posts worldwide provide loans directly to their customers, with most deploying alternative strategies to penetrate this market (e.g. partnering with other institutions)

Postal operators are in a position to benefit from opportunities arising from market, technological, policy and regulatory trends in the area of financial services

Opportunity trends

Market trends

Benefits for postal operators

- ▶ Diversifying into **e-commerce** payments could increase Posts' revenue
- ▶ Offering more innovative solutions to traditional pain points could allow Posts to further reap the benefits from the surge in **cross-border payments**
- ▶ Improving **customer perception** will be necessary for Posts in order to respond to rising customer standards and hence improve competitiveness

Technological trends

- ▶ Partnering with **fintechs** could enable Posts to implement innovative automated services
- ▶ Emphasis on digital remittance channels could help Posts to increase remittance volume
- ▶ Developing **mobile money** solutions could make transfers easier and faster
- ▶ Leveraging **blockchain and cryptocurrencies** could increase speed and reduce costs of remittances for postal operators

Policy and regulatory trends

- ▶ In certain, especially African countries, Posts could strategically position themselves as key **financial inclusion** actors through confirmed government policy and partnerships. Key strengths are: better usage of existing public assets, confidence, digital financial education and cash availability
- ▶ By adhering to stringent anti-money laundering/combating the financing of terrorism regulatory requirements, Posts could position themselves as the most trusted (public) FS players
- ▶ In certain countries, Posts could benefit from policymakers' desire to support the **organizational agility** of FS providers (e.g. regulatory sandboxes, innovation adoption)

The study resulted in 12 recommendations structured around five areas that the UPU can leverage to meet the stakeholders needs regarding the provision of PFS

- A Enhance the existing PPSA and UPU operating model
- **1** Enhance access to postal payment services through a more integrated and inclusive process
- 2 Diversify financial services offerings

- Enable the provision of advisory/tailored/customized technology solutions and Technical assistance (TA)
- 8 Customize technology solutions and TA interventions relevant to DOs' needs
- **9** Build strategic partnerships with DO suppliers and service providers

- B Improve the sharing of knowledge, expertise and best practices
- **3** Facilitate and drive knowledge transfer
- 4 Increase awareness of the role of the UPU

recommendations as to how the UPU can support DOs in the provision of PFS

- Expand the voice of Posts in PFS policymaking
- **10** Promote the postal role in domestic financial service stakeholder engagements
- **11** Develop special target programmes promoting financial inclusion (FI)
- 12 Promote the Post as a trusted governmental partner to serve the populations

These 12 recommendations have been identified based on findings from desktop research, interviews with DOs and financial and postal regulators, and questionnaires completed by DOs, and taking into account an assessment of deployment constrains.

- © Diversify the existing UPU offering through new partnerships and funding models
- **5** Assess the viability of existing products and solutions & allocated funding for growing PFS
- 6 Assess new operating and partnership models
- 7 Enable/diversify member and extrabudgetary funding

Financial Inclusion Technical Assistance (FITAF) Program Goals in Partnership with Gates Foundation & VISA

UPU Financial Inclusion Technical Assistance Projects Deliver Technical Products & Solutions

Country	DFS Program Type	FITAF Enabling & Expanding Financial Inclusion Through Digital Financial; Services Solutions							How do people make & receive Payments	How do People Access & Use Accounts	Target Customer
